Have you ever wondered how you get the water you use in your daily life? Whether it's to brush your teeth, quench your thirst, cook your food, or even take a swim – all of us need water! Does it come from the ground, a river or a lake? How do you make sure it's safe to drink, and what happens when it goes down a drain? In this season's HYDRO DYNAMICS challenge, you'll explore these questions and many more, and you'll get to learn about the amazing engineering used to protect your most precious liquid asset – water!
